Experience

iOS Developer at Apple Developer Academy @UC

Collaborate with team to create iOS apps by running several processes :

- *Research and Validation* : using CBL (Challenge Based Learning) framework to engage with the challenge and dig deeper to finally arrange the solution concept for the challenge.
- *Developing App* : collaborate with team to design and create an app based on the solution concept with design tools like Adobe & Sketch and code with Swift programming language and iOS framework to provide feature that fits with the challenge.
- *Testing the App* : create and arrange testing scenarios, find potential users for testing the app, get their experience & feedbacks, and make improvements based on evaluation results.
- *Project Presentation* : present the application result to other participants, mentors, and Apple's reviewers.
- Use Scrum as framework to develop the apps

APPS PROJECT

Intern at ICT Department of Ciputra University

Create new design for UC Student app for better user experience. The design include color asset and icon menu for the app. I create the icon use Adobe Illustrator and use prototype tools for the UI.

Teaching Assistant for Statistics

Responsible for assisting students in understanding several concepts and methods in statistics (probability, sampling, one & two sample test, correlation, regression, etc), coordinate with lecturer in providing assessments on assignments, examinations, and student activeness

Member of Creative, Student Union Information and Multimedia Technology

Collaborate with team to organize event like NPLC (National Programming and Logic Competition) from Information and Multimedia Technology major.

Education

Q Search

Apple Developer Academy @UC

Feb 2021 - Dec 2021

At Apple Developer Academy, I learn about app development lifecycle, from the engagement & ideation to the design & development process. We also learn the testing process of the apps to the potential user to get their experience & feedbacks and making improvements based on evaluation results.

Bachelor of Technology

Information and Multimedia Technology major at Ciputra University, Surabaya

2015 - 2019

Frateran Senior High School Maumere, Sikka

2012 - 2015

Skill

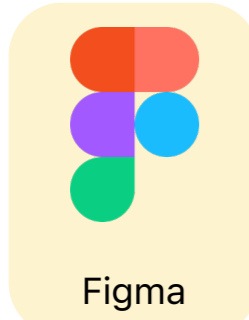

Swift Programming Language

iOS framework (SwiftUI, UIKit, ARKit, SceneKit, CloudKit, etc)

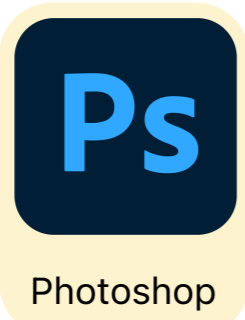

PROTOTYPING & DESIGNING TOOL

Sketch

Figma

Photoshop

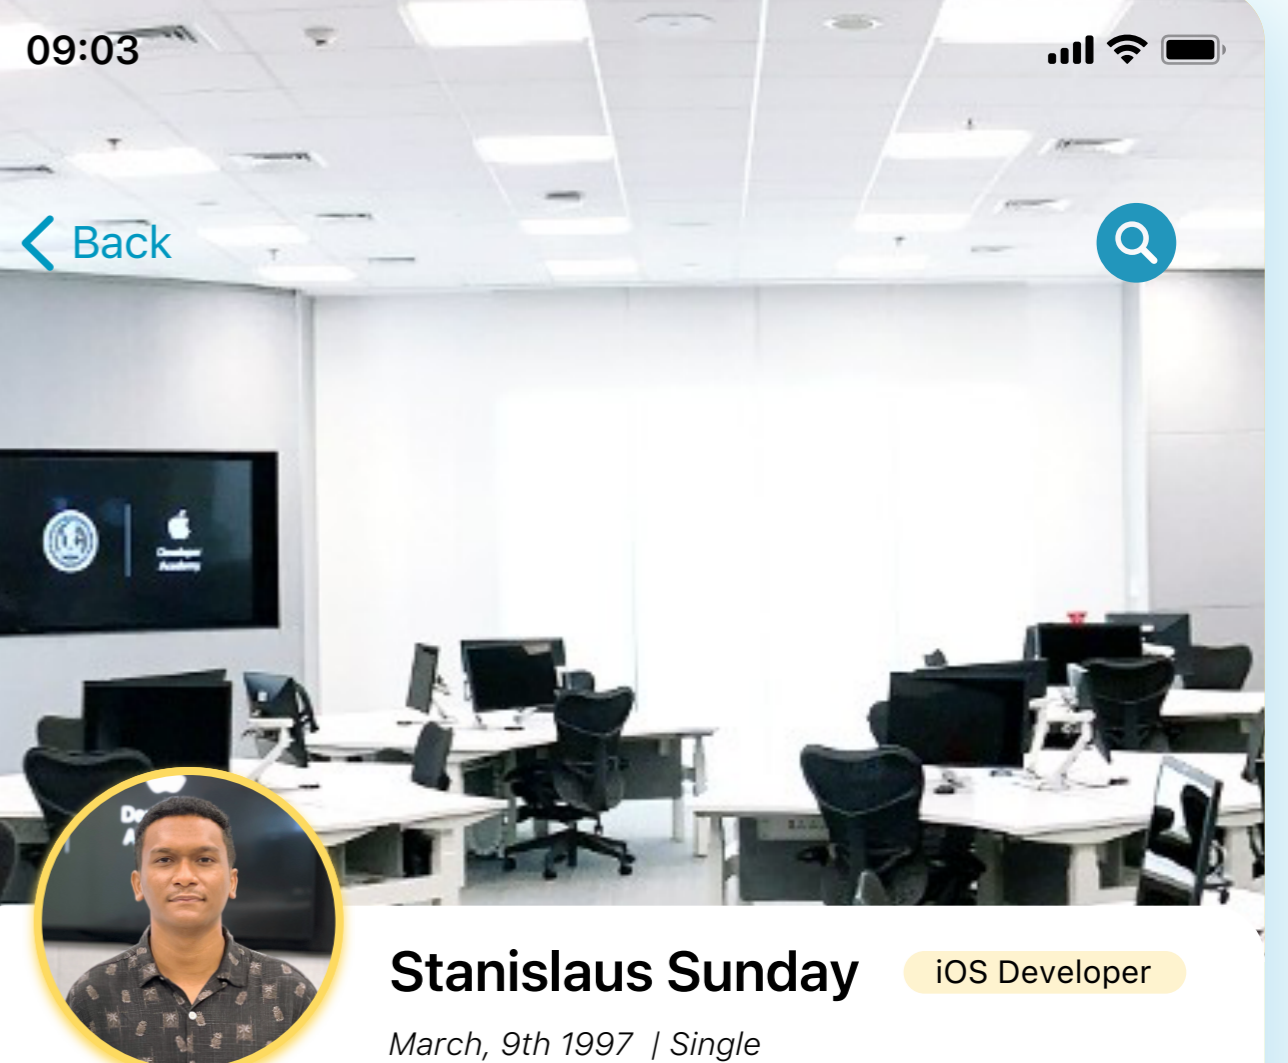

Illustrator

LANGUAGE

Bahasa (Fluent)

English (Passive)
